

Car-Go-Net™

For The Recycling Industry

Meeting the transportation safety needs of the industry

Strong, disposable plastic netting from InterNet, Inc. contains small debris during the transport of crushed automobiles to reduce the risk of road hazards caused by loose, falling debris.

The netting is ideally suited to comply with the new regulations for securing cargo of crushed automobiles hauled on the nation's highways. It's also ideal for containment of scrap metal in rail cars and sided over-the-road vehicles.

Car-Go-Net™ from InterNet, Inc.

- Improves highway safety
- Complies with new regulations for transport of crushed cars
- Disposable
- Economical
- Easy to apply
- Wide variety of roll sizes
- Highly visible
- Minimal wind resistance
- Design strength in use, yet easily shredded after use
